

Taking Ownership of your Financials Workshop

A workshop to support farmers understand their farm business financial performance which is critical in order to be able to make informed decisions and changes to improve on-farm productivity and profitability.

This workshop is designed to build farmer confidence in understanding the financial performance of their business. It enables farmers to identify where the farm business is performing well and areas with further potential.

Working through a set of farm financial accounts, participants will learn how to calculate the three KPIs required for their farm Action Plan; Net Production per Effective Hectare, Farm Operating Expenditure (FOE) Ratio and EBITRm per Effective Hectare. A completed farm Action Plan is a key requirement of Action Group involvement.

Fully funded by RMPP, we have facilitators ready to deliver this workshop to Action Groups now; call or email us to book your group in.

“The workshop is a good foundation for all farmers; it was pitched at the right level and provides an opportunity for farmers to further build on what they learn.”

- Geordie McCullum,
Action Group facilitator
