Taking Ownership of Your Financials – now with online delivery!

Understanding a farm's performance is critical for farmers to make informed decisions and changes to improve their on-farm productivity and profitability.

This workshop is designed to help farmers gain a better understanding of financial statements, how they're structured and where to find key information; livestock reconciliations and trading accounts, balance sheet/statement of financial position and statement of profit or loss/statement of financial performance. Farmers are guided through a set of farm financial accounts by a subject matter expert and will learn how to calculate three key performance indicators (KPIs), these are:

- Net Production per Effective Hectare
- Farm Operating Expenditure (FOE) Ratio
- Net Production per Effective Hectare

The four-hour workshop is fully funded by the Red Meat Profit Partnership (RMPP) and available to groups of sheep and beef farmers of up to 12 participants.

RMPP is pleased to offer 'Taking Ownership of your Financials' online in addition to our popular face-to-face workshop. Delivered through video conferencing with a dedicated subject matter expert, the online workshop can be completed by groups of up to 12 users across three 90-minute sessions.

If you are interested in finding out more or to register your group call us on **0800 733 632**.
